

REMARKS:

REMARKS REGARDING NEW CLAIMS:

Claims 47-61 have been written to include limitations deemed allowable in earlier prosecution. More particularly, Applicant has included that the valve has at least one member arranged for axial displacement caused by cam engagement of the member and the cam is arranged to rotatably engage with a guide portion arranged on the valve member for an axial displacement of the valve member in the several independent claims. This feature is not found in the cited prior art, or any other art of record, or appropriate combination thereof.

The undersigned representative requests any extension of time that may be deemed necessary to further the prosecution of this application.

The undersigned representative authorizes the Commissioner to charge any additional fees under 37 C.F.R. 1.16 or 1.17 that may be required, or credit any overpayment, to Deposit Account No. 14-1437, Order No. 06730.0056.NPUS00.

In order to facilitate the resolution of any issues or questions presented by this paper, the Examiner should directly contact the undersigned by phone to further the discussion.

Respectfully submitted,

Tracy Druce
